MINERALS

100% natural mineral blend
Soothing on skin and muscles
Enhanced water quality

GENTLE ON SKIN, HAIR AND EYES

A CLEAR CHOICE

Discover the secret to exceptional swimming pool water quality that is low in chemicals and rich in magnesium minerals recreating a natural mineral pool. EcoClear contains the perfect blend of magnesium-rich minerals for premium pool water quality that feels silky smooth and is crystal clear. Magnesium is well documented to support general vitality and wellbeing.

Dosage Instructions

EcoClear Minerals should be operated between 3500 and 4500 ppm as per your equipment supplier.

For new pools, add 4 bags for each 10000 litres

For existing pools, add 15 kg per 10000 litres to raise ppm by 1000 ppm.

Benefits of using Magnesium-rich EcoClear Minerals:

- Improved water quality – softer and gentler on skin, hair and eyes
- Easy to maintain without high use of chemicals, keeping chloramines to a minimum
- Softens the skin and stimulates skin hydration
- Detoxifies and regenerates the skin, boosting its natural protective system
- Relaxes and helps ease muscle tension
- Ideal for people that suffer from allergies, asthma and eczema

Converting Your Existing Pool Is Easy

Any salt water pool can easily convert to an EcoClear Mineral pool. Simply substitute salt with EcoClear Minerals.

Converting a chlorine dosed pool, simply add a chlorinator and start using EcoClear Minerals. Maytronics recommends Ozone Swim dual pool purification.

New Pools

For a new pool, ensure your pool builder specifies EcoClear Minerals.

For best results always use EcoClear Minerals with **EcoClear Filter Media** made from 100% recycled glass.
